My name is Andy Nelson, and I am originally from Fort Scott, Kansas. I attended the University of Kansas and graduated in 1995 with a Bachelor of Science degree in Civil Engineering. Upon graduation I began working for George Butler & Associates in Lenexa, KS in their Water Resources Department. After 12 years, I made a career move to my current employer HNTB Corporation. At HNTB, I serve the role of both Water Resources Department Manager and Office Operations Manager for the Overland Park Office. My project experience includes the design and management of storm drainage improvement projects, floodplain studies, and watershed master plans along with providing water resources design support for all types of transportation projects.

My home is in southern Overland Park with my wife of 11 years (Kristin) and two energetic young children - Brody (4) and Hadley (2). I am a huge sports fan with a special interest in the Jayhawks and Chiefs. As the years go by, I do a lot more sports watching than actual playing, but still try to sneak in a little golf when time allows. My other interests include hunting, fishing, and traveling with friends and family.
