## **Bio**

I'm a fifth generation Kansas Citian. I attended Shawnee Mission East Highschool and received my Bachelors of Science in Civil Engineering from Kansas State University. After graduation, I joined Tetra Tech intending to be a transportation engineer. Instead, on day one, I was tasked with designing an outfall for a wastewater treatment plant and quickly discovered my real passion is making dirty water clean. I'm a registered Professional Engineer in Kansas, Missouri and Oklahoma and I've worked on projects in all three states involving water supply, collection system investigation, rehabilitation and separation, pump station design, and wastewater treatment. My husband (also an SMEast grad/engineer) and I live in Old Leawood with our son Tommy (Age 4), daughter Kelly (Age 1) and dog Hank. We all love baseball and travelling.

## **Fun fact about you that will be surprising/interesting to your classmates!**

I've been to 22 different major league baseball stadiums and have plans to visit all 30!

## **Favorite quote**

Be nice to each other. It's really all that matters. – Dawn Hochsprung

## **My job would be a lot easier if**

if politics didn't come into play.
