Graduate from Iowa State University in Landscape Architecture and Planning. I have been working in Geographic Information Systems (GIS) for over 20 years in services and applications for various industries. I have been with Bartlett & West for 2.5 years as an Operations Manager and Project Manager in the Rail Division working with Class 1's on GIS solutions for real estate, engineering, environmental and PTC.

On the personal side my wife Nancy is a writer and author. We have three adult daughters: Crystal, a photographer in Telluride, CO, Hallie, an elementary school teacher in Fort Collins, CO and Natalie a Junior at Black Hills State University, a basketball player and summer wildlands firefighter. In my spare time I like to fly fish.
