I began working at Ruggles and Bohm in 1994 as summer help with the survey crews. I graduated from Kansas State University in 2000 with a BS in Civil Engineering. Upon graduation I joined RB full time as an Engineer. I have spent most of my career doing residential subdivision design. As that work has slowed considerably of late, I've gotten the opportunity to do a lot more capital improvement and site work. I'm a member of WSPE and KSPE as well as ACEC.

My wife, Rennie, and I got married in 2000. We have 2 kids, Halee is 10 and Logan is 7. I played soccer for 2 years at Friends University before moving on to K-State. I was president of the Soccer Club during my last 2 years at KSU. I play in an indoor soccer league regularly and outdoor whenever I get the chance. I coach my son's club soccer team and help both kids' baseball teams in the summer. I enjoy doing home improvement projects and am currently in the middle of finishing my basement. In between everything else I try to sneak in a round of golf whenever I can.
