I graduated from Kansas State University with a degree in Architectural Engineering. Out of college I worked briefly for a consulting firm in Denver, CO and then a large general contractor from St. Louis, MO. I had a desire to return to Manhattan and was offered a position by Orazem and Scalora Engineering (OSE). I have been with OSE since October of 2005. We perform Mechanical, Electrical, and Plumbing engineering consulting services. Our project portfolio is broad. Typically we are involved in the design of buildings for the sectors of Laboratory, Education, Commercial, Housing, Industrial, Recreation, and City/County. Most of our projects are in-state. I am a licensed engineer in the State of Kansas.

I have been married to my wife Amanda for nine years. She is also a KSU grad and works as a nurse practitioner at the University's Lafene Health Center. We have three children; Layla (7), Alec (5), and Ella (3). Our time outside of work is dedicated to our little family. The kids play organized sports and take swimming lessons which keeps us hustling. I am a big sports fan and spend my downtime watching ballgames on T.V. We have season tickets to KSU football and attend several basketball and baseball games each year. I enjoy craft beer and do a little homebrewing when I can fit it in.
