Bio

I was born in Manhattan, Kansas and grew up nearby in Wamego. I attended Kansas State University and graduated in 2010 with a bachelor's degree in Biological and Agricultural Engineering. After college, I started my career with an environmental engineering firm in the Kansas City area. In September 2013, I returned to the Manhattan area to further my career as a civil engineer with Schwab Eaton. I primarily work in the solid waste, water, and wastewater engineering disciplines. I enjoy spending time with my girlfriend, Danielle, and German shorthaired pointer, Bella. We spend numerous weekends hunting, fishing, camping, swimming, and bike riding!

Fun fact about you that will be surprising/interesting to your classmates!

I enjoy playing drums and was a member of a rock band in high school.

Favorite quote

"Many men go fishing all their lives without knowing that it is not fish they are after." – Henry David Thoreau

My job would be a lot easier if

AutoCAD never crashed and the copier/plotter never ran out of paper!
