Bio: I grew up in SE Minnesota, before going to University of Kansas. I received my Master's degree in 2013 in Civil Engineering with an emphasis in Structural Engineering. After graduating I spent three years working in New Orleans and three years in working Iowa City before moving back to Kansas city this year to work at Alfred Benesch & Co. I met my wife while at K.U. and we now have a 1.5 year old son named Mason.

Fun fact about me: I was born in Lawrence but moved to Minnesota when I was only 2. During those 2 years I actually lived less than a mile from my wife.

Favorite Quote: "If you're not making mistakes, then you're not doing anything"

My job would be easier if..... We always had all the information we needed, more than a day or two before the deadline.
