John grew up on a dairy farm in Wisconsin and moved to Kansas when he was starting his freshman year of high school. After high school he attended the University of Kansas and earned a Bachelor of Science in Civil Engineering degree with Structural Engineering emphasis, Master of Science in Civil Engineering degree with Structural Engineering emphasis and a Master of Business Administration degree. He is a licensed Professional Engineer registered in multiple states and is an active member of several professional organizations including the American Concrete Institute (ACI) and International Concrete Repair Institute (ICRI). He has served on numerous association's Board of Directors and committees and is currently a Director for the Kansas Chapter of ACI and a Director and Past President of the ICRI Great Plains Chapter. After college, he worked for structural engineering firms in both Kansas City and Jacksonville, Florida. After relocating back to the Kansas City area in January 2005, John started his own firm.

Krudwig Structural Engineers is a structural engineering consulting firm that designs commercial buildings. Designs include concrete, steel, wood, light-gauge metal framing and CMU. In addition to traditional new designs, the firm specializes in concrete restoration, strengthening and repair. Projects have included traditional concrete deterioration repair as well as the specialized areas of corrosion deterioration, FRP strengthening, impact damage, storm damage and blast-resistant design and strengthening of existing structures.

John lives in De Soto, Kansas with his wife and two sons, Cole (9) and Vance (6). They are active in scouts, 4h, baseball, soccer, basketball and flag football. They love to go to the lake and to travel when they can find the time. Personal hobbies include coaching his son's baseball teams, scuba diving and gardening.
