Rob Johnson serves as Engineering Manager, Pipelines and Facilities in SKW Energy's Pipeline Services group where he works closely with clients, partners and staff to develop clear project objectives and to accomplish them on time and within budget across a wide range of oil and natural gas installations. He is a registered P.E. in Kansas, Missouri, and Iowa.

Prior to joining Energy Services, Rob served as Senior Project Manager in SKW's Development Services group. His extensive site development management and engineering design experience included commercial and office buildings, public facilities and infrastructure improvements (street, storm, sanitary and water main extensions). Previously, he spent time at SKW as a Survey Field Tech while in college.

Rob graduated from the University of Kansas in 2001 with a Bachelor's Degree in Civil Engineering and currently lives in Olathe with his wife Heather and their 3 children. When he's not working, Rob is usually coaching or cheering his kids on in baseball, basketball, dance, gymnastics, or soccer. He likes to spend whatever remaining free time on the golf course or on the water.
