Bio: I was born and raised in Onaga, KS. I have an older sister and younger brother. I attended Kansas State University where I got a Bachelor's in Biological Systems Engineering, a Master's in Environmental Engineering, and a minor in Business. My thesis work consisted of a lot of field work on Fort Riley and then spending time in the GIS department developing a regression equation for the prediction of gully erosion. After college, I started at GBA and have been there ever since, working in their Stormwater Group. I am currently a project manager there. I recently became Director I on the Kansas City ASCE Board of Directors and have been involved in Engineer's Club of Kansas City as well. I married my husband, Lucas, nearly two years ago and we moved to Olathe at that time. I enjoy spending time reading, running, going on hikes/walking the trails, traveling, and spending time with family and friends.

Fun Fact: My family owns a cattle ranch back home, where I've helped fix fence and work cattle.

Favorite Quote: "What lies behind us and what lies before us are tiny matters compared to what lies within us." Ralph Waldo Emerson

My job would be a lot easier if: everyone communicated better.
