Michael Ehss is the geotechnical department manager at Terracon's Wichita office.

As an Austrian native, Michael holds a bachelor of science degree in civil engineering from the Technical University of Graz-Austria.

Michael has been with Terracon for 19 years and is responsible for business development, management and engineering report preparation.

He also supervises geotechnical staff and coordinates with field crews and laboratory technicians in testing, evaluation and data gathering activities on project sites.

Michael's project portfolio covers a wide spectrum including high-rise buildings, highway, bridges, large wind turbine projects, refinery structures, and power plants. He is the geotechnical engineer of record on a multitude of Kansas projects including prominent structures such as the Hyatt Hotel, Exploration Place and the twin cable-stay pedestrian bridges at the Keeper of the Plains site in Wichita, and several large-size wind turbine projects near Harper, Salina, Concordia, and Montezuma, Kansas.

Michael is married and has two daughters 16, and 9 years old. His hobbies include skiing, long-distance running, and skydiving.
