I am a 2007 graduate of Oklahoma State University with a Bachelors degree in Fire Protection and Safety Engineering Technology. I finished my Master's degree in Fire Protection Engineering from the University of Maryland in May 2011. Originally I am from Enid, Oklahoma, but moved to Rosebush, Michigan as a teenager.

Since 2008 I have been working for Poole Fire Protection in Olathe as a fire protection engineer. During this time I have primarily worked on projects for the Department of Defense both in the US and Japan where I typically design fire alarm, mass notification, sprinkler, and other life safety systems.

My wife and I have one son at home. I've been in school since 2003 and haven't had any time, between family, work, and school, to have any real hobbies. Maybe now that things are starting to slow down I will be able to start exploring some possibilities.
