I graduated from Iowa State University in 1995 with a Bachelor of Science in Civil Engineering and from University of Kansas in 2004 with a Master of Science in Engineering Management.

In 1996, I took a position with DRG (now Benesch) in their transportation group. During my time with DRG I worked on a variety of roadway projects in Kansas and Missouri. In 2000, I accepted a position with GBA's transportation group. Over the past 15 years, I've been involved in the project management and design of various roadway projects for State DOTs and numerous cities in Kansas and Missouri. My experience includes projects ranging from conceptual alignment studies to complicated urban interchanges. I have worked directly with contractors on design-build projects and performing value engineering services on traditional design-bid-build projects.

I am active in my community through various organizations. I served on the Great Plains SPCA Board for three years, after volunteering for several years prior. I led Team Brunette for five years as the team captain for the Alzheimer's Association Blondes vs. Brunettes Flag Football Game. Responsibilities included organizing team events, recruiting team members, fundraising, and overall promoting awareness of the Alzheimer's Association. I currently serve on the Board of my homes association. I often volunteer for various STEM related outreach events. I am big animal lover and treasure my own two dogs and two cats.
