I grew up in Wichita, KS, and attended Kansas State University, where I earned a Bachelor's Degree in Civil Engineering in 2005. After graduation I went to work for Baughman Company in Wichita, specializing in residential land development design. In 2012 I moved to our commercial site design team, where I work today, managing commercial design projects. My role involves conceptual to final site design, erosion control design, and underground utility design. I am currently the Vice President of WSPE and have been involved Engineer for a Day and some Project Lead The Way events.

In 2009, I married my wife, Angie. We have two sweet daughters, Avery (5) and Elise (2), that occupy all available time and energy and we wouldn't want it any other way. We enjoy being fans of K-State sports and we enjoy playing nearly any sport we can find, mostly basketball, volleyball, tennis, and golf. We also like to travel, when our schedules allow it.
